SUMMARY OF QUALIFICATION

Software Engineer passionate about turning ideas into intelligent AI solutions with Python, Generative AI, LLMs, and RAG. Built AI-powered applications using LangChain, MCP, FastAPI, and REST APIs to solve real-world problems. Eager to create scalable AI products that deliver meaningful impact through innovation.

EXPERIENCE

- Python Programming Intern at CodeAlpha** Remote
- Developed and debugged Python applications while solving programming challenges.
- Artificial Intelligence Intern at CodeAlpha** Remote
- Worked on AI applications including data preprocessing, model training, & evaluation.
- AI Engineer Intern at DevSynt** Remote
- Built AI-powered applications using Python, LangChain, RAG, and LLM technologies.

PROJECTS

- EnergyCert Bot - AI Driven GEC Management System (FYP)** 
Generative AI, LangChain, MCP, RAG, Decentralized Systems, AI Agents
 - Developed an AI-driven system to automate the lifecycle of Granular Energy Certificates (GECs) including creation, transfer, and audit tracking through secure APIs.
 - Built an AI chatbot using LangChain, MCP, and RAG to enable natural language certificate operations and improve response accuracy.
 - Implemented agentic AI workflows and a decentralized marketplace for secure, transparent certificate trading.
- AI Code Assistant**
Generative AI, LangChain, RAG, MCP, FastAPI, GitHub API
 - Built an AI-powered coding assistant to explain code, generate solutions, and assist with debugging using LLMs.
 - Implemented RAG to provide context-aware responses from project repositories and documentation.
 - Integrated GitHub APIs and MCP tools to automate repository analysis and developer workflows.
- AI Customer Support Agent**
Generative AI, LangChain, RAG, MCP, FastAPI, ChromaDB
 - Developed an AI-powered support assistant that answers customer queries using company knowledge bases.
 - Implemented RAG to provide accurate, context-aware responses while reducing hallucinations.
 - Integrated MCP tools and FastAPI APIs to automate customer support workflows and external service interactions.

EDUCATION

Bachelor of Science in Software Engineering 2022 – 2026
University of Gujrat Gujrat

SKILLS

Programming Languages: Python	Generative AI & AI: LLMs, Generative AI, Agentic AI, RAG, Prompt Engineering FastAPI, RestAPI	Web Development HTML, CSS, JavaScript
Database: SQL, DBMS, Blockchain	Soft Skills: Problem Solving, Critical Thinking, Communication, Teamwork, Leadership, Presentation Skills	Software Development OOP, DSA, Software Analysis & Design, Software Quality Engineering, API Integration
Frameworks / Tools: LangChain, LangGraph, MCP, FastAPI, REST APIs, GitHub, VS		

CERTIFICATES

- Python for Data Science, AI & Development (IBM) 
- Generative AI App with RAG & LangChain (IBM) 
- Diploma in Computer Operator (VTI)
